# Usability improvements

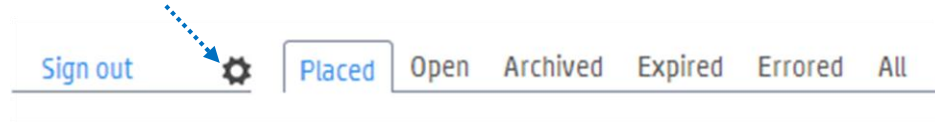

## How can a change “Order Now” to “Request for Quotation”?

### From “Order Now” to “Request for Quotation”

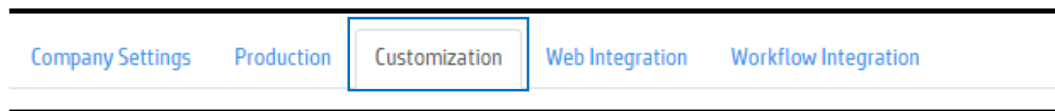

Customize the final step “Order Now” to “Request for Quotation” to improve the ease of use for your end-users

1. [Set your Customization settings](#)

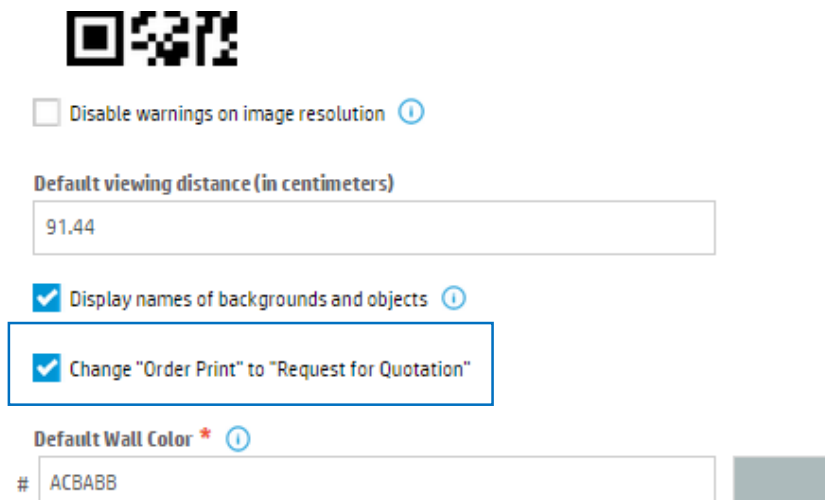

Click on Settings

Enter Customization settings

2. Click on Change “Order Print” to “Request for Quotation” tab

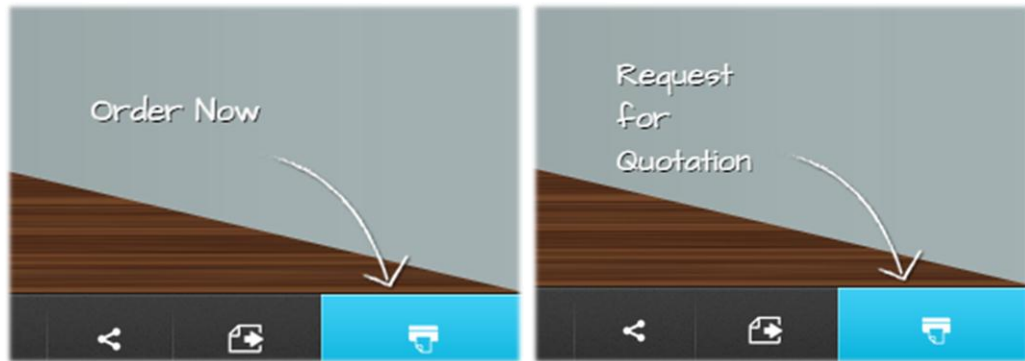

3. Finally, remember to click on “Update Settings”

## “Order Now” vs “Request for Quotation

By selecting this option in your customization settings, the final call-out for customers will change

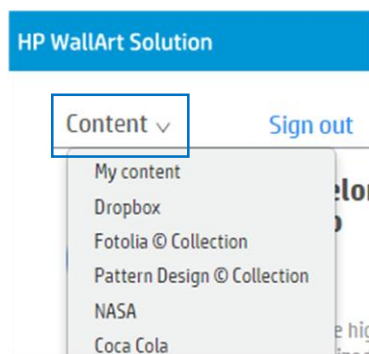

## How can I disable object scaling?

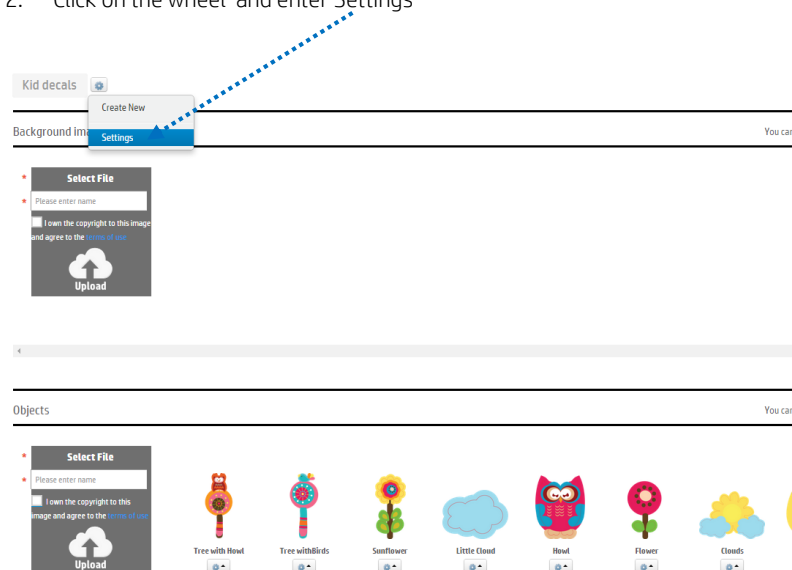

### Disable object scaling

Offer fixed object sizes for wall decals with predefined contour cut lines

1. Enter Content and select the folder where you wish to disable object scaling

2. Click on the wheel and enter Settings

- Click on “Disable scaling of objects”

## Kid Decals Settings

## How can I provide a price estimation?

### Price Estimation

Offer your customers a price estimation on your designer, including sqm and Fotolia images to purchase

1. Click on settings

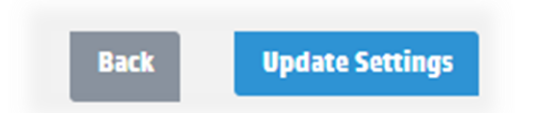

2. Enter Web Integration settings

 A screenshot of the 'Web Integration' settings page. At the top, there are tabs: 'Company Settings', 'Production', 'Customization', 'Web Integration' (selected), and 'Workflow Integration'. Below the tabs, the text reads: 'These are all the resources you need for your engineering team to integrate HP WallArt solution with an external website.' followed by a link 'Go to developers page'. Under 'Project Status Link', there is a text input field containing the URL 'https://hpwallart.com/digitalprinting/projects/<order\_number>'. Below this, under the 'Price' section, there are two input fields: 'Price per Sq M \*' with the value '26.91' and 'Currency Symbol \*' with the value 'USD'.

3. Enter your **price per sqm** and specify the **currency**

 A screenshot of the 'Web Integration' settings page, identical to the previous one, but with a blue rectangular box highlighting the 'Price' section. This box encompasses the 'Price per Sq M \*' input field (containing '26.91') and the 'Currency Symbol \*' input field (containing 'USD').

4. Finally, remember to click on "Update Settings"

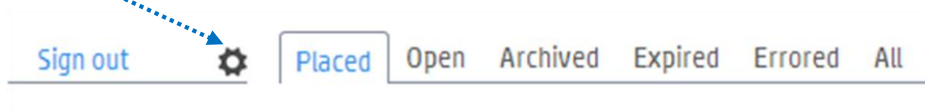

#### Note:

The price estimation per sqm will be indicated for all applications, the only parameter changing is the sqm.

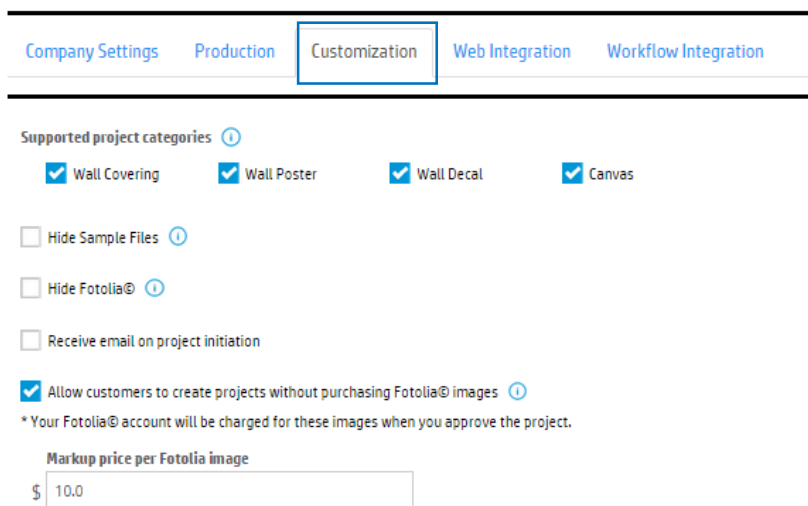

## Include a Fotolia images price

Offer your customers a price estimation on your designer, including sqm and, if you own a Fotolia account, images to purchase

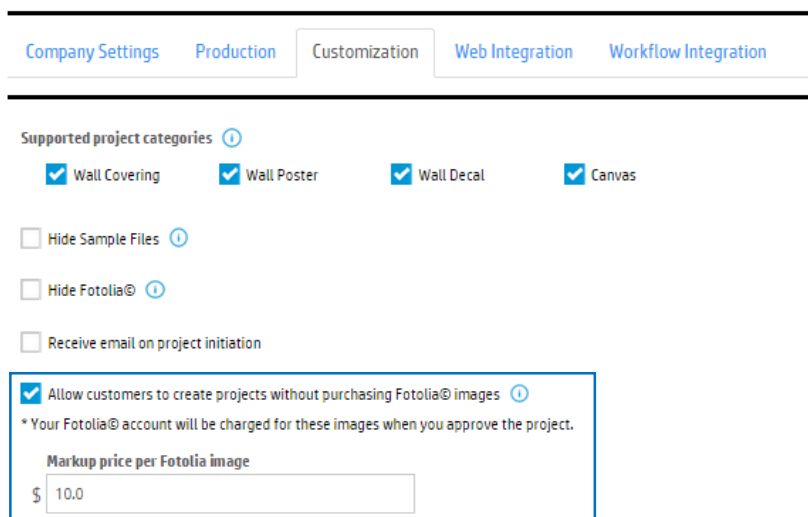

1. Click on settings

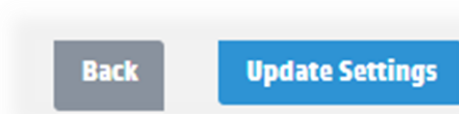

2. Enter Customization settings

3. In order to set a markup price for Fotolia images, you first need to mark "Allow customers to create projects without purchasing Fotolia images"

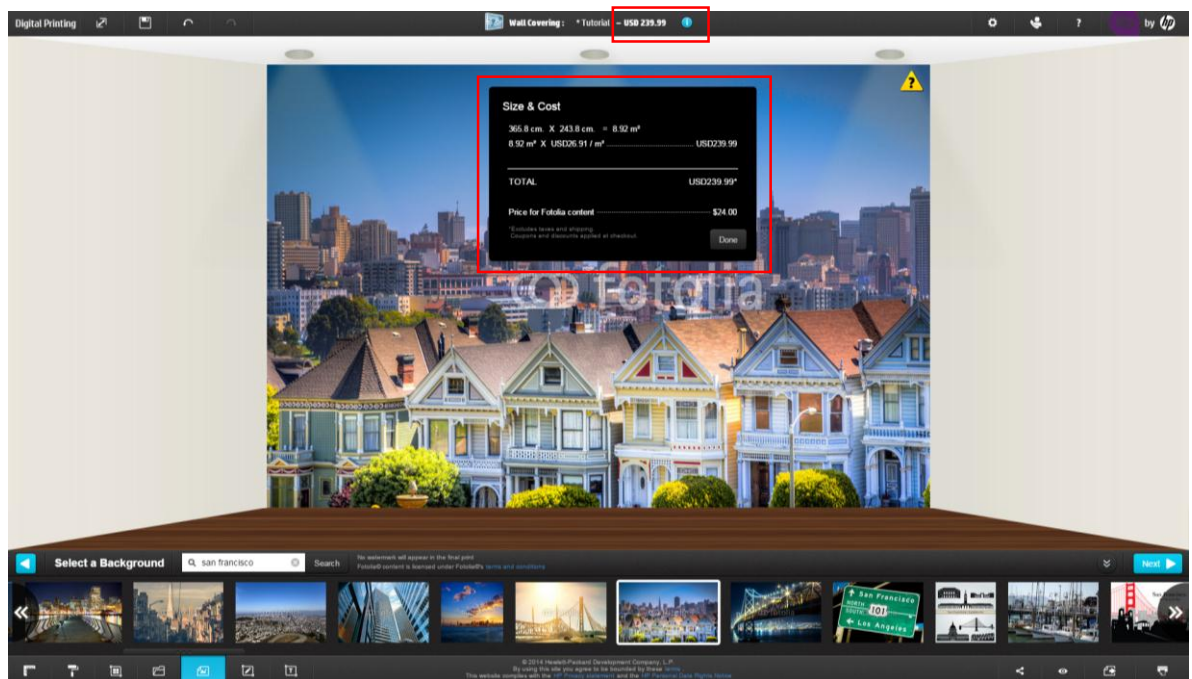

4. Finally, remember to click on "Update Settings"

Note:

The total sqm price and the Fotolia total price per image to purchase will be excluded, but visible

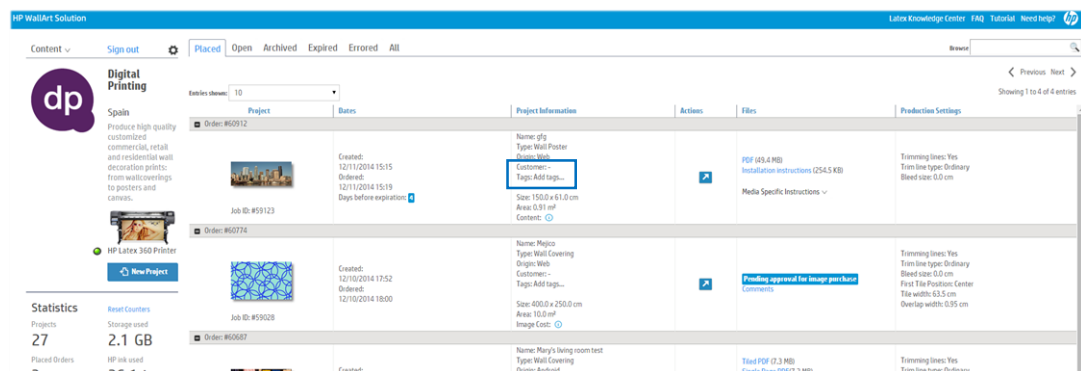

## How can I search my projects easily?

### Add a Tag in Dashboard page for each project

Include a tag to help you classify, manage and search projects created:

Set your mouse on "Add tags..." and a small pencil indicator will appear, double click and editing will be enabled

## Edit your tag Project

Write your tag and click outside the tag and automatically it will appear

The screenshot shows the HP WallArt Solution dashboard. On the left, there's a sidebar with the 'Digital Printing' logo, a description of the service, and statistics: 27 Projects, 2.1 GB Storage used, 3 Placed Orders, and 26.1 L HP ink used. The main area displays a table of projects. The first project, Order #5912, is highlighted. In the 'Project Information' column, the 'Tags' field is being edited, and the word 'skyline' is entered. The tag is highlighted with a blue box. The table also shows dates, sizes, and actions for each project.

## New visible tag in your project information dashboard

You need to refresh HP WallArt page in order for it to work

This screenshot shows the same dashboard as before, but now the 'Tags' field for Order #5912 shows 'skyline' as a new tag. The tag is highlighted with a blue box. The table also shows the 'Media Specific Instructions' column, which contains links to PDF files and installation instructions. The statistics on the left remain the same.

## Search for your project/s by tag on the browser automatically

The screenshot shows the HP WallArt Solution dashboard with a search bar at the top right. The search bar is filled with the word 'skyline'. Below the search bar, the results show a single project, Order #5912, which has the tag 'skyline'. The project information is displayed in a table, showing the name, type, origin, customer, tags, size, area, and image cost. The tag 'skyline' is highlighted in the 'Tags' field.

## How can I get new English Wall Covering and Poster Installation Instructions format?

### New Installation Instructions format

Offer your customers new English Wall Covering and Poster Installation Instructions formats – Click on installation instructions

### Poster installation instructions

hp

## How to put up your custom-designed Wallposter

Congratulations – your Wallposter has arrived! Sure, you can simply tack your Wallposter up as you would a traditional poster BUT this is much cooler than a poster. You can fix it in the wall as wallpaper for a "painted" look, follow these easy instructions.

Project name: JGF  
Project size: 1000 x 600 cm  
Project area: 0.37 sq.m.  
Order date: 12/10/2014

### Before installation

What you receive	Wallposter	Instructions
Tools you may need	Floor Cover Spray Latex Primer Sissors Ruler/Tape Measure Wallpaper hanging brush Sponge Tape measure Sharp knife Spray Latex Ruler/Tape Measure Bucket of clean water Strainer or ragged & crumpled cloth Pruning	Only if the wallposter requires water or paste Only if the wallposter requires paste Only with pre-pasted wallposter Only if you need to remove a old wallposter Only if the state of the Wall requires it

Wall number: 10123

hp

### Easy Step-by-Step Instructions

**Step 1**  
Clean  
Clean the application area with a sponge and water.

**Step 2**  
Prepare the Wallposter: PREPARE THE WALL.  
System 1: Loosely roll out your Wallposter with the printed side facing the wall. Submerge the roll in a bucket of water and let it soak for 10 seconds (Figure 1).  
System 2: Lay Wallposter flat (printed side down) and wet the back side with a sponge and water or use a spray bottle. Figure 2.  
Prepare the Wallposter: PASTE THE WALL.  
Prepare the paste following the manufacturer's recommendations. Be sure that you mix well. Apply the paste on the "Back Side" of the poster. Put your poster face down on the table.  
Load the Wallposter in roll and edge the excess of paste.  
Apply the paste from the top to the bottom and from the center to the edges in a herringbone pattern. Figure 3.

**Step 3**  
Apply  
Apply to your wall. Figure 3.

**Step 4**  
Smooth  
Use a sponge or squeegee to smooth the Wallposter to the wall. Start from the top and bottom edges and move towards the center. Figure 4.

**Step 5**  
Sponge away  
Sponge away any excess paste and leave to dry.

**Removal**  
Use a sponge and water to remove the Wallposter from the wall. Peel the Wallposter from the wall. If the Wallposter is not removed, use a sharp knife to cut it into strips and remove it. Clean off the residual paste with a sponge and water.

### Recommendations

We recognize that custom creations come in many shapes and sizes. In addition to the standard wallposter, we highly recommend you view a short video demonstration on our HP website to the right or visit the following URL for more details: [www.hp.com/go/wallposter](http://www.hp.com/go/wallposter)
