

# DyeSub On-A-Roll<sup>®</sup> Lifter for HP Stitch S1000 DTF applications

# DyeSub On-A-Roll® Lifter for HP Stitch S1000

## Direct-To-Fabric applications

### What is it?

Media lifter specifically designed for use with HP Stitch S1000 printer while DTF printing. **Validated HP Solution**

### What it does?

Media lifter allowing “touch-less” media transportation from printer to heat press with no need to change the spindle\*.

Enables one operator to easily and safely move large media rolls and load them directly into printer/heat press. **Helps to avoid ink transfer to unwanted surfaces.**

Sold by Foster

\* Solution compatible with Practix rotary heat press for DTF application
