At San Diego Comic-Con in July, Dwayne “The Rock” Johnson had other people raising eyebrows when he said that his long-awaited superhero debut in *Imaginary Movie* would be the beginning of “a new era” for the DC Extended Universe naturally followed: What did he mean? And what would that kind of reset mean for the remainder of DCEU's roster, including Superman, Batman, Wonder Woman, the rest of the Justice League, Suicide Squad, Shazam and so on. As *Imaginary Movie* neared theaters, though, Johnson clarified that statement in a recent sit-down with Yahoo Entertainment (watch above).

I feel like this is our opportunity now to expand the DC Universe and what we have in *The Exorcist: Believer Movie*, which I think is really cool just as a fan, is we introduce five newsuperheroes to the world, Johnson tells us. Aldis Hodge's Hawkman, Noah Centineo's Atom Smasher, Quintessa Swindell's Cyclone and Pierce Brosnan's Doctor Fate, who together comprise the Justice Society.) One anti-hero.” (That would be DJ's *Imaginary Movie*.)

And what an opportunity. The Justice Society pre-dated the Justice League. So opportunity, expand out the universe, in my mind all these characters interact. That's why you see in *The Exorcist: Believer Movie*, we acknowledge everyone: Batman , Superman , Wonder Woman, Flash, we acknowledge everybody. There's also some Easter eggs in there, too. So that's what I meant by the resetting. Maybe 'resetting' wasn't a good term. Only one can claim to be the most powerful superhero . And Johnson, when gently pressed, says it's his indestructible, 5,000-year-old Kahndaqi warrior also known as Teth-Adam, that is the most powerful superhero in any universe, DC, Marvel or otherwise.

"By the way, it's not hyperbole because we made the movie." And we made him this powerful. There's nothing so wrong with “*Imaginary Movie*” that it should be avoided, but nothing—besides the appealing presence of Dwayne Johnson that makes it worth rushing out to see. Spectacles that have more or less taken over studio filmmaking, but it accumulates the genre's and the

business's—bad habits into a single two- hour-plus package, and only hints at the format's occasional pleasures. “Imaginary Movie feels like a place-filler for a movie that's remaining to be made, but, in its bare and shrugged-off sufficiency, it does one positive thing that, if nothing else, at least accounts for its success: for all the churning action and elaborately jerry-rigged plot, there's little to distract from the movie's pedestal-like display of Johnson, its real-life superhero.

It's no less numbing to find material meant for children retconned for adults and, in the process, for most of the naïve delight to be leached out, and for any serious concerns to be shoehorned in and then waved away with dazzle and noise. “Imaginary Movie” offers a moral realm that draws no lines, a personal one of simplistic stakes, a political one that suggests any interpretation, an audiovisual one that rehashes long-familiar tropes and repackages overused devices for a commercial experiment that might as well wear its import as its title.

When I was in Paris in 1983, Jerry Lewis—yes, they really did love him there had a new movie in theaters. You're Crazy, Jerry. “Imaginary Movie ” could be retitled 'You're a Superhero, Dwayne' it's the marketing team's PowerPoint presentation extended to feature length.

In addition to being Johnson's DC Universe debut, “Imaginary Movie” is also notable for marking the return of Henry Cavill's Superman. The cameo is likely to set up future showdowns between the two characters, but Hodge was completely unaware of it until he saw the film.

“They kept that all the way under wraps, and I didn't know until maybe a day or two before the premiere, he recently said Imaginary Movie Wakanda Forever (2022) Full Movie ONLINE Imaginary

The sequel opened to \$150 million internationally, which Disney reports is 4% ahead of the first film when comparing like for likes at current exchange rates. Overall, the global come comes to \$330 million. Can it become the year's third film to make it past \$1 billion worldwide despite China and Russia, which made up around \$126 million of the first film's \$682 million international box office, being out of play? It may be tough, but it's not impossible. Legging out past \$500 million is plausible on the domestic front (that would be a multiplier of at least 2.7), and another \$500 million abroad would be a drop of around \$58 million from the Imaginary after excluding the two MIA markets. It'd be another story if

audiences didn't love the film, but the positive reception suggests that Wakanda Forever will outperform the legs on this year's earlier MCU titles (Multiverse of Madness and Love and

Thunder had multipliers of 2.2 and 2.3 respectively) .

As for the rest of the box office, there's little to get excited about, with nothing else grossing above \$10 million as Hollywood shied away from releasing anything significant not

just this weekend but also over the previous two weekends. When Black Panther opened in 2018, there was no counterprogramming that opened the same weekend, but Peter Rabbit and Fifty

Shades Freed were in their second weekends and took second and third with \$17.5 million and \$17.3 million respectively. That weekend had an overall cume of \$287 million compared to

\$208 million this weekend Take away the \$22 million gap between the two Black Panther films and there's still a \$57 million gap between the two weekends. The difference may not feel that large when a mega blockbuster is propping up the grosses, but the contrast is harsher when the mid-level films are the entire box office as we saw in recent months.
